

About Us

QEST has built a reputation based on reliability, efficiency, loyalty and outstanding service, to all our customers.

With a high regard for the safety of our operators, the environment and quality of our work, we are a company capable of taking on projects and delivering results.

Our versatile staff are trained in:

- First Aid Level 2
- Handling of Prescribed Waste / Dangerous Goods
- Confined Space Entry
- Road Traffic Management
- OH&S Red Card Induction
- Rail Accredited
- Telstra Accredited Cable Location
- EPA Licensed
- Asbestos Removal Licensed Class B

Vision

At QEST our success is not determined by *what* we do but *how* we do it

teamwork...

reliability ...

professionalism

Non Destructive Excavation

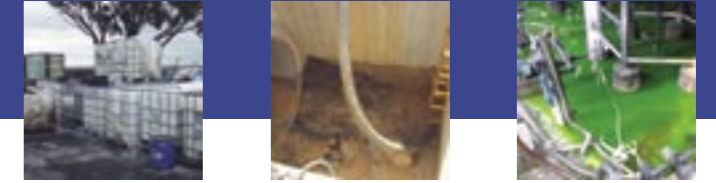

Hydro Excavation is a clean, low impact and non-destructive method of excavation that utilises the soft digging power of high pressure water and vacuum.

Our underground is densely packed with services whose locations are often poorly mapped. Excavation with traditional methods can damage these services and puts operators and property at risk.

Hydro Excavation creates MINIMAL ENVIRONMENTAL IMPACT, allows for safe working around underground utilites, gas mains, sewer pipes and water pipes without risk to property or operators.

- Potholing and trenching
- Excavating in confined areas
- Post hole digging in heavily serviced areas
- Underground utility location verification

Liquid Waste

Our licensed waste vehicles meet strict EPA guideline and are operated by highly trained and experienced personnel.

Our team has extensive knowledge in the management of waste and can develop a solution to your waste disposal needs.

- Chemicals
- Oils
- Drums
- Triple interceptors
- Directional Drilling/Boring Wastes
- Prescribed Waste
- Septic tanks
- Photographic
- Sludges
- Animal
- Hydro Carbon Water

Vacuum Loading

High velocity wet/dry vacuum education systems, suitable for the cleaning of:

- Pump stations
- Wet Wells
- Gross Pollutant Traps
- Stormwater Pits
- Sewer Pits
- Directional Drilling/ Boring
- Utility Pits
- Tank Cleaning

High Pressure Water Cleaning

Our High Pressure Water Jetting systems can be utilised with a range of pressure, volume and nozzle combinations to achieve effective cleaning of:

- Tanks
- Vessels
- Pits
- Process equipment
- Industrial equipment
- Buildings
- Pavement areas
- Storefront
- Loading areas

Pipe & Cable Locating

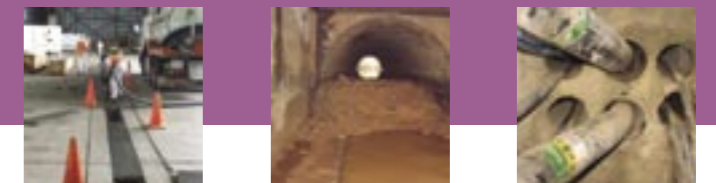

Our qualified underground asset locators can assist in the detection and location of underground utilities and services, such as:

- telecommunications
- sewer and stormwater
- electricity
- water
- gas

Drain Cleaning, Conduit Jetting/Roping

Our high pressure water jetting equipment uses a variety of specialised nozzles for the effective removal of debris, blockages and build up from stormwater and sewer pipes.
